

MRS. DARCY AND THE DOCTORS

Mrs. Darcy was rich. She was very rich indeed. In fact, she was so rich that it made her sick.

She suffered from fatty degeneration of the bank account.

She had been everywhere; she had seen everything; she had done everything.

There was nowhere she couldn't go; there was nothing she couldn't do; there was nothing she couldn't have—except be happy.

It bored her to ride, and to drive; it bored her to stand up, and it bored her to sit down.

It bored her to eat, and to drink, and to sleep.

So she sent for the doctor—Dr. Black.

He gave her pills.

She still grew worse.

So she sent for a third doctor—Dr. White.

Dr. White was a modern doctor, a very modern doctor, an ultra-modern doctor.

"What is the trouble with you?" said Dr. White.

"Everything!" said Mrs. Darcy.

"You have a beautiful home," said Dr. White.

"I am tired of it," said Mrs. Darcy.

"You have beautiful jewels," said Dr. White.

"I am tired of them," said Mrs. Darcy.

"You have a beautiful face," said Dr. White.

"I am tired of it," said Mrs. Darcy.

"And can you help me?" said Mrs. Darcy.

"I can try," said Dr. White.

Mrs. Darcy gave the prescription to her secretary.

The secretary gave it to the maid.

The maid gave it to the butler.

The butler gave it to the page.

And the page took it to the chemist.

The chemist looked at the scrap of paper, and read what was written on it, and appeared very much surprised, and then handed it back to the page.

"This is not for me," said the chemist.

"It is for—Mrs. Darcy," said the page.

So the page took the prescription back to the butler.

The butler gave it back to the maid.

The maid gave it back to the secretary.

And the secretary gave it back to Mrs. Darcy.

"The chemist says that this is not for him," said the secretary. "He says it is for you!"

"For me!" said Mrs. Darcy. "What a nuisance! I am so tired. I am so bored. I am so weak. I am too tired to read it. You must read it for me. What does it say?"

The secretary looked at the scrap of paper and became very red in the face.

"What does it say?" demanded Mrs. Darcy. "Why don't you read it to me?"

"I—I don't understand it!" said the secretary.

"Well, it is not necessary for you to understand it!" said Mrs. Darcy. "If it is for me, you are not supposed to understand it! If it is for me—I will understand it! What does it say?"

"It says," said the secretary, "Prescription for Mrs. Darcy, with Dr. White's compliments: Do something for somebody!"

"What does that mean?" cried Mrs. Darcy.

"I—I told you that I didn't—understand it, Mrs. Darcy!" said the secretary.

"Well, why don't you understand?" cried Mrs. Darcy.

And Mrs. Darcy worked herself into violent hysterics.

But all the rest of the day and all through the night Mrs. Darcy heard the words ringing in her ears, saw the words dancing before her eyes: "Do something for somebody!"

She almost wondered if there was anything in this advice, in this strange advice, this peculiar "prescription."

But then her old doctors came with their old remedies, Dr. Black with his pills and Dr. Green with his powders, and she soon forgot the new doctor with his new notions and his impertinence and his insults.

"Do something for somebody!"

The idea! When she was too sick even to do anything for herself!

A Cold Proposition.

"What we want is an administration that is fearless and energetic," said the patriot; "an administration that is unembarrassed by compromising friendships and unprejudiced by personal animosities."

"Nonsense!" interrupted the practical politician, "what I want is an administration that can be relied on to give me a job."—Washington Star.

Will Use South African Coal.

It has been stated in the Calcutta press that the government railways in India will next year use coal brought to India by steamer from Natal, because it is better than Bengal coal and more economical.

Increases Liquor Duties.

The British government has increased the duties on spirits for Sierra Leone 25 per cent. in response to the agitation concerning liquor traffic in Africa.

Horses Lose Their Job.

The city of Milwaukee has almost abolished the use of horses in all municipal departments.

UTAH STATE NEWS

The value of the crops raised in Utah during 1908 is placed at \$18,539,613.

The question of incorporating the town of Bingham Junction is again being agitated.

A bill has been introduced in congress providing for pensions for the Utah Indian war veterans and their widows.

An acreage of 30,000 of sugar beets raised in the state of Utah during the past season yielded 360,000 tons, worth \$1,800,000.

Building permits in Salt Lake City broke all previous records during the month of November, coming close to the million dollar mark.

An effort is to be made by leading men of Ogden to bring the next annual convention of the National Association of Wool Growers to that city.

There are 2,061,152 sheep in the state, worth approximately \$7,500,000, according to the annual report of the state board of sheep commissioners.

While suffering from a series of epileptic fits in the emergency hospital at the Salt Lake city jail, Richard Drone, a laborer, bit off the end of his tongue.

In accordance with instructions issued by the Murray city council, sixty candle-power lamps have been installed on all the principal streets of Murray.

The pigeon fanciers of the state are planning for a pigeon exhibit at the January show of the Utah State Poultry association, to be held in Salt Lake City.

Bill Polos, a Greek employed in the railroad yards at Bingham, was caught between two cars and his right leg so badly crushed that amputation was necessary.

Utah's livestock in 1908 is estimated to be worth \$28,967,669. The farm value of horses and mules is placed at \$70 a head and poultry is valued at 29 cents a fowl.

Iowa received first in the awards on state exhibits at the national horticultural congress. Second place was given to Idaho, third to Washington, fourth to Utah and fifth to Maryland.

According to the report of the bureau of statistics presented to the governor, Utah's valuation in real and personal property, railway and equipment, and livestock, is placed at \$569,273,031.

There are approximately 9,200 miles of public roads in the state, of which 3,550 are mountain and 5,650 are valley roads. Approximately 4,000 miles are passable for loaded wagons at all seasons of the year.

The chamber of commerce of Ogden is endeavoring to get the city council to look into the electric power plant matter, and to learn whether the present companies are taking every precaution against danger.

The curtailment of the liquor traffic is now occupying the attention of the Richfield city council. Saloon regulation has recently been under discussion, and some drastic changes in the city laws may be made.

The chief probation officer in Grand county has reported that when he took office in April a single case was pending in the juvenile court. This case has been dismissed and no other case has come before his court.

An overheated radiator caused a panic in an Ogden school one day last week, the fire drill being entirely forgotten by the children, who ran out of doors. There was fortunately no one hurt and no damage done.

As the result of being beat over the head by a burglar about a year ago, George W. Jones, a resident of Salt Lake City, has become mentally unbalanced and was last week committed to the state mental hospital.

To cope with the contagion of smallpox sweeping over Salt Lake City, the city physician has been granted authority to employ a second assistant and a determined fight will be made to stamp out the disease.

H. A. Pedersen, judge of the juvenile court of Cache county, in his annual report to Governor Cutler, puts in a strong plea for the establishment of a detention home, not only in his own county, but in every county of the state.

Government and private enterprises at the present time are engaged in irrigation projects in Utah that will reclaim 700,000 acres of arid lands for cultivation. The value of the reclaimed lands, with water rights, is placed at an average of \$40 an acre.

Miss Anna Beach, deputy county clerk of Cache county, was robbed within three blocks of her home in Logan, one evening last week, the robbers securing but \$3 and the notes taken at an inquest held that day, but Miss Beach was prostrated by the shock.

John W. Att, who shot and killed Julius Nielson at Logan, and who will be tried on a charge of murder in the first degree, maintains that he had no intention of shooting Nielson, but mistook him for a man who had given him (Att) a beating a short time before.

An effort is being made by Congressman Howell to have the state of Utah reimbursed by the national government for money expended by the territory of Utah from 1865 to 1868 for the equipment and maintenance of militia in defense of the settlers from Indian depredations.

Willie Goldberg the 17-year-old son of a reputed Denver millionaire, was committed to the state industrial school for incorrigibility by Judge E. G. Gowans of the juvenile court of Salt Lake last week, the millionaire father refusing to come to the boy's assistance, it is said.

MINES AND MINING

The production of coal in Utah in 1907 was 1,750,000 tons, valued at \$3,000,000.

Gold is mined in nineteen counties of Idaho, and silver is found in almost all the counties that yield gold.

The sales on the Salt Lake stock exchange for 1907 are placed at 17,725,856 shares, valued at \$13,997,165.68.

The total dividends for 1907 and 1908 paid by the mines of Utah thus far are placed at the enormous sum of \$100,000,000.

Goldfield is making a strong bid for the next meeting of the American Mining congress, and it is believed that the enterprising camp will land it.

Gold production from the Snake river deposits in Idaho is gaining. In that section a number of ambitious hydro-electric power and railroad building projects exert a powerful uplift on the mineral industries.

The new Goldfield Consolidated mill is practically completed and has been running for several days trying out the machinery. Parties who have seen the mill pronounce it a model and declare it to be working perfectly.

Despite the drop in prices of nearly all metals, due in large measure to the financial unrest of the last three months of the year, 1907 was the best year in the history of mining in the state of Utah, both as to production and profit.

The Bluff City, Utah, oil region is reported to be one of the liveliest spots on the petroleum map at present. Twelve drilling rigs are on the ground, pounding away day and night, and five producing oil wells have been struck.

At the depth of 300 feet in the Lucero shaft of the Orizaba Mining company, operating in the Indian Peak district, streaks of gray copper and chalcopryite are coming into a massive body of ore on which the shaft is being sunk.

The first shipment of ore from the new strike in the ground of the Lion Hill Consolidated company at Ophir was settled for at the smelter last week upon controls showing values of 255 ounces in silver, 7 per cent lead and \$1.20 in gold.

The principal copper producing area of Idaho is in the Coeur d'Alene country. The copper production for this year will reach a value of \$1,500,000. This industry is now in a condition to be considerably increased, if the price of copper goes a little higher.

In gold and silver production in Idaho there are 267 producers, including eighteen placers. In ore valuation the yield for the current year will average 42 cents in gold and \$3.34 for silver per ton. The ton value for gold, silver, copper, lead and zinc will average \$12.55.

One of the busiest mining camps in Nevada today is Lodi, where the Lodi Mines company is not only developing a mine which is proving a wonder, but is building a 100-ton smelter to treat its own ores. The company has laid out a townsite near the mine and smelter.

The bottom of the winze, fifteen feet below the 150 level in the Nevada Hills mine at Fairview, Nevada, shows a magnificent body of high-grade shipping ore, while three to four inches of exceptionally rich sulphides carry gold and silver contents of \$2,000 to the ton.

R. A. Millicke, one of the largest operators of the Osceola district in Nevada, announces that he is about to launch the Kohinoor Mining, Milling & Power company, backed by Portland, Ore., capitalists, to take over the Kohinoor group of mining claims in Spring valley.

The matter of petitioning the legislature at its coming session to establish a state mining or industrial bureau, with an appropriation large enough to make its work effective, will be taken up at an early meeting of the Utah branch of the American Mining congress.

The richest discovery on Goldfield Florence ground since that of the famous Engineers' lease has been uncovered in the adjoining block of ground to the east, formerly known as the Daisy Florence, and now the property of the Mitchell-Fairfield Development company.

The Independent Salt company has just completed construction of a dike on its property about three miles south of Saltair, on the lake shore and it is announced that plans for a refinery will be soon gotten out. It is expected to build the refinery during the coming summer.

Greater activity in copper mining is being manifested now than ever before in the history of Utah. A total of 141,289,640 pounds of lead was produced in 1907, and it may be expected that the lead mines of Utah will show a larger production for the current year than for 1907.

Cuprite, Nev., where are large sulphur deposits which have been found to carry gold, apparently in paying quantities, now lays claim to the further distinction of having ores which carry a high percentage of titanium, a valuable metal which occurs in conjunction with oxide of iron.

Directors of the Utah Consolidated Mining company, in New York on December 15, posted the company's regular quarterly dividend of 50 cents a share, aggregating \$150,000. This makes \$600,000 paid by the company this year and swells the total of profits distributed to \$8,050,000.

FOLEY'S KIDNEY CURE

Will cure any case of Kidney or Bladder Disease not beyond the reach of medicine. No medicine can do more.
